Trusted data for sustainability decisions

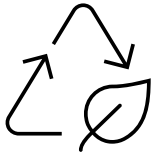

ecoinvent

September 23, 2026

Katerina Tsampazi, Product Manager

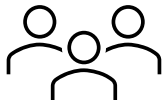

What is ecoinvent?

ecoinvent is the non-profit behind the world's most widely used and transparent environmental database.

Mission-driven

Our mission is to enable people and organizations to make science-based, data-driven sustainability decisions.

Independent non-profit

Our independence is built into how we are governed and funded. It's the foundation for the trust our users place in our data.

Quality is our north star

We assure data quality through peer review, transparent documentation, and a track record of regular annual updates for over a decade.

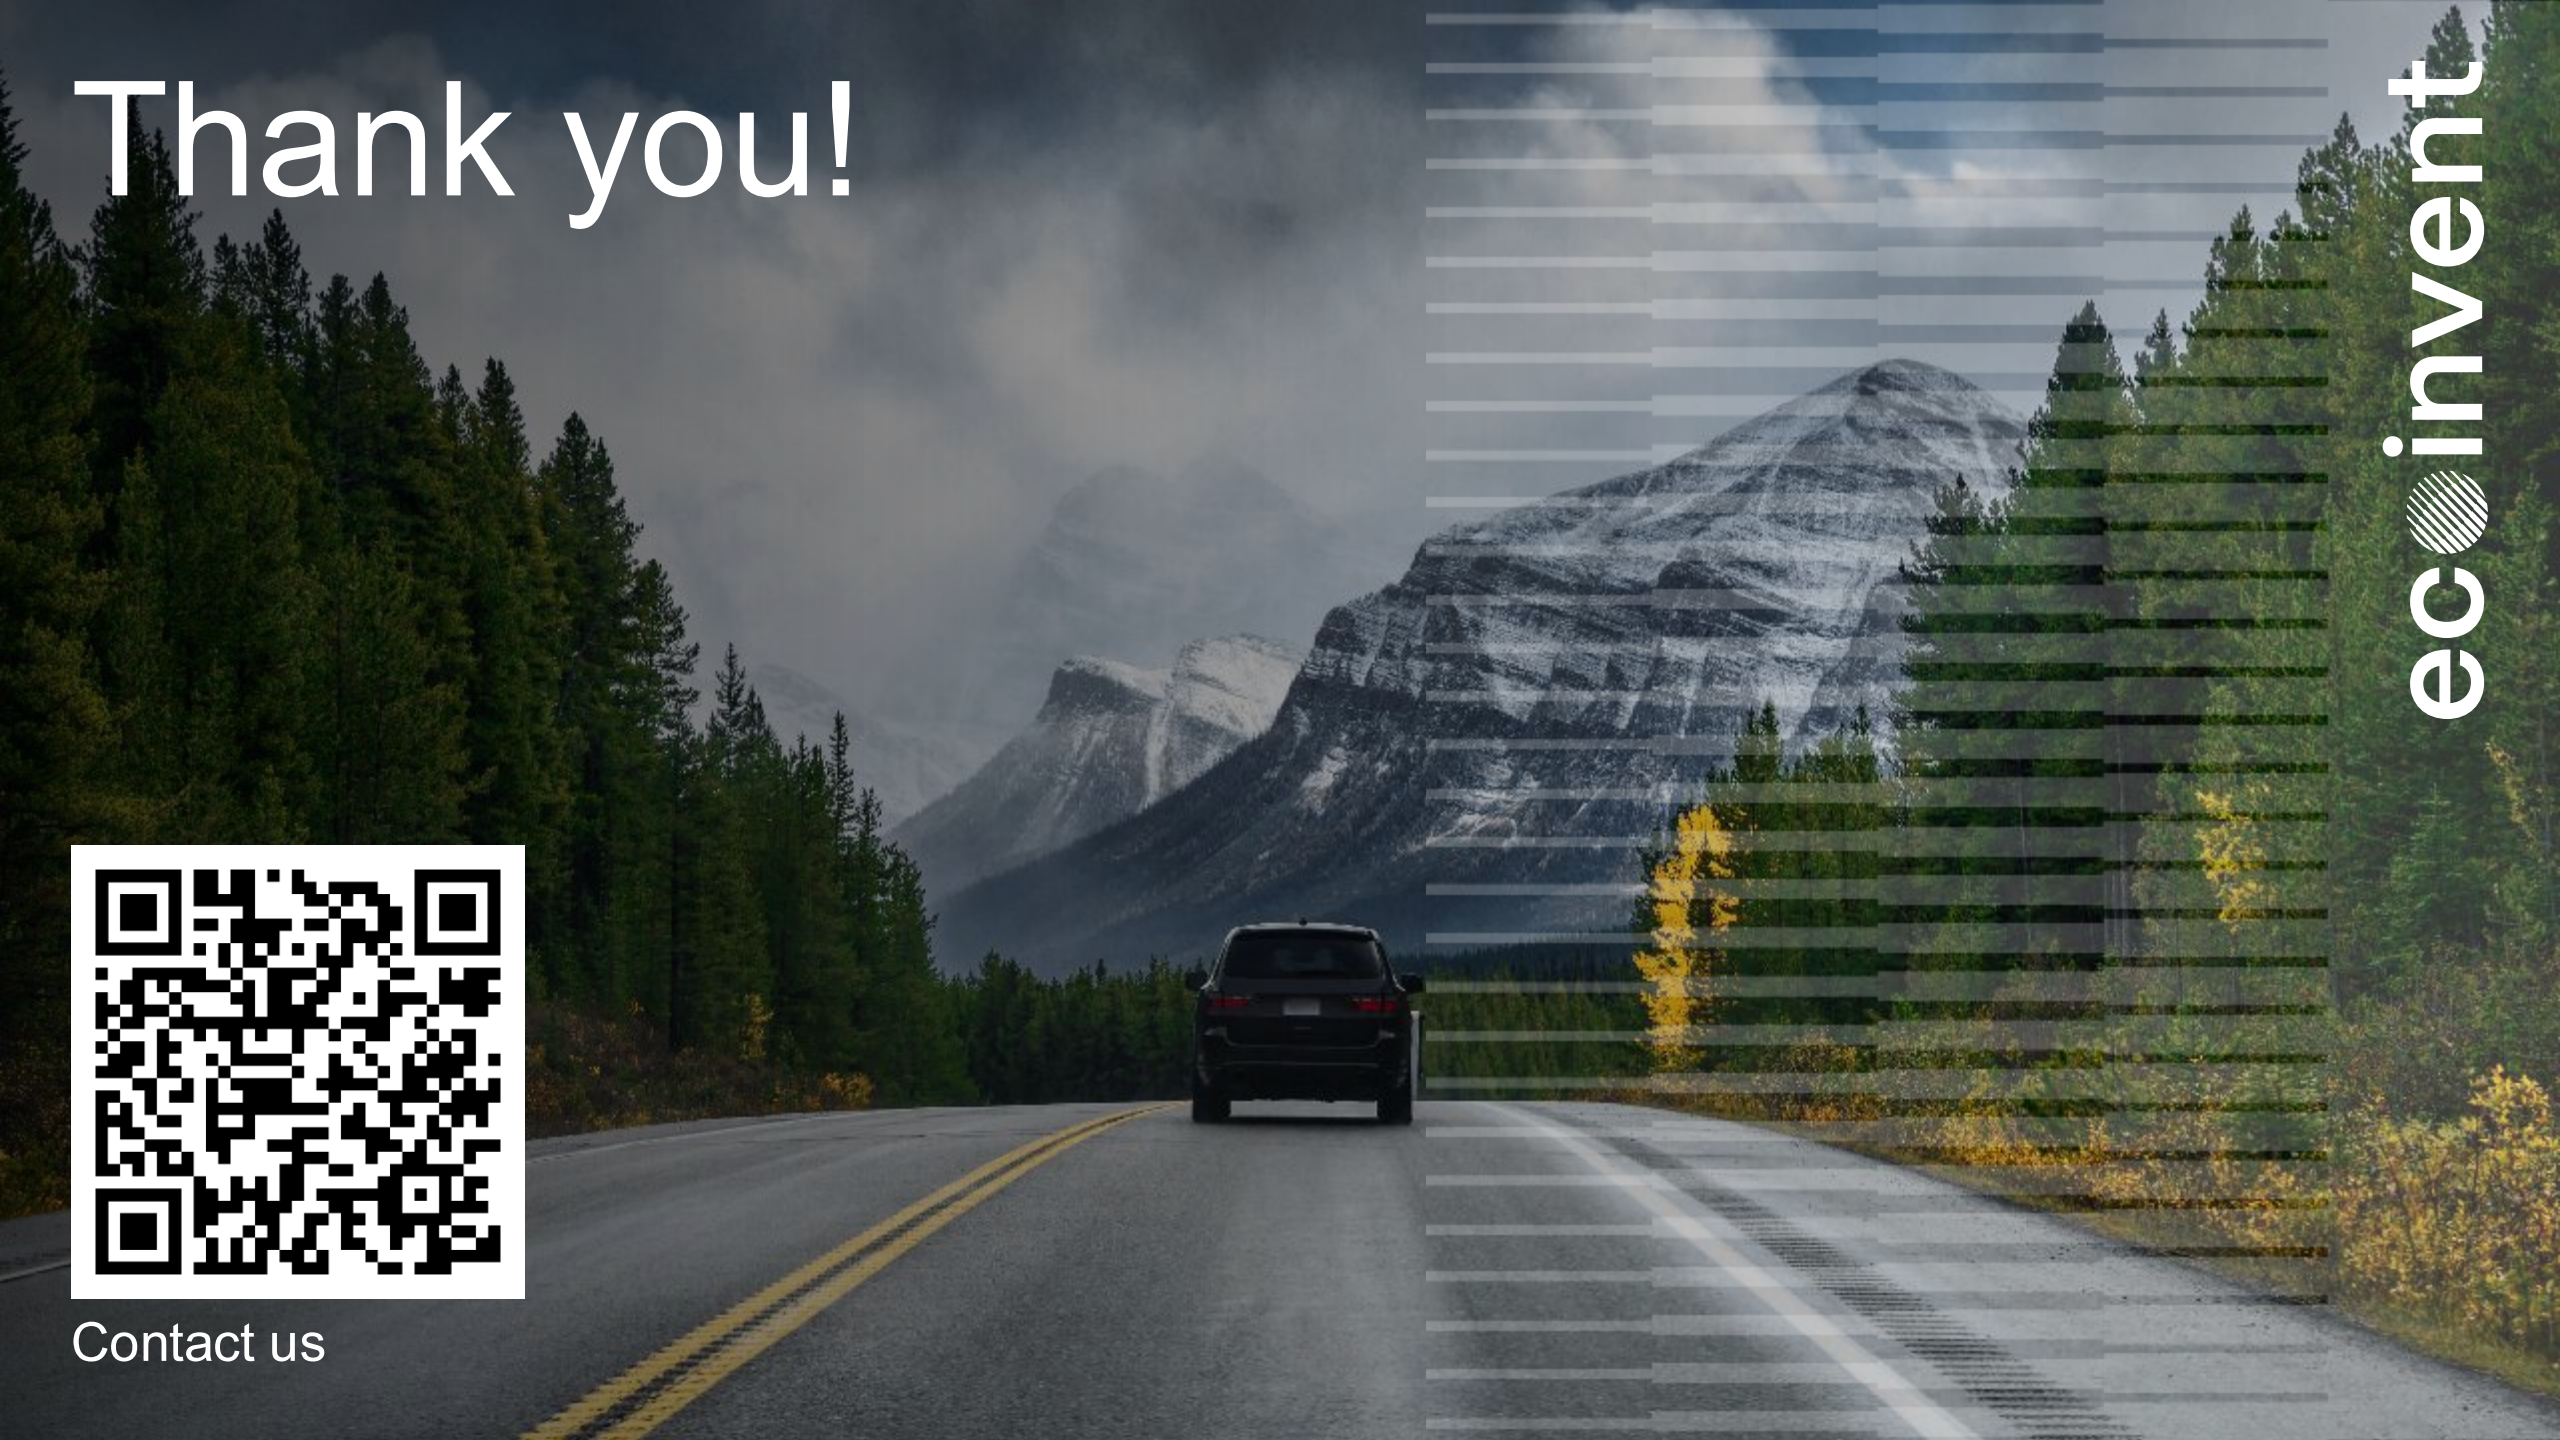

Our data enables organizations to move sustainability from compliance to competitive advantage — with the confidence to stand behind every decision they make.

Enable people and organizations to make science-based, data-driven sustainability decisions

What is coming

01	**More & easier ways to connect**	**API** (available) – Dataset mapping capability (coming soon) **MCP** (coming soon) **JSON** format (coming in 2027)
02	**V3.13**	**Pharmaceuticals** as a new sector Improved **textiles coverage** **Electricity mix datasets** updated with fresher statistics
03	**V4**	**Supply chains** that reflect how the world actually works Better **regional representation**, including water More reliable integration (**JSON format**)

Thank you!
